SNG QA DATASET

TBT Information

current action: enter the **roundabout**

future action: turn left

supplementary action : take the **third exit**
summary: Enter the roundabout and take the third exit to the left

SNG QA

Q: The current navigation information is <SNG>. Integrate global planning and local perception to plan the vehicle's path.

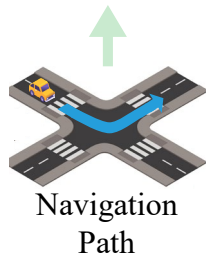

A: {
global planning: Enter the roundabout and take the third exit to the left,
local planning: The road has **light traffic** with **no traffic lights**, but watch for pedestrians ahead. Global navigation directs taking the third left exit, and you should **maintain speed** and **drive around the island**, then take the third exit.
waypoints: <WAYPOINTS>}

SNG VLA

Prompt

- **Role:** You are an autonomous driving assistant.
- **Task:** Given the navigation data <SNG>, combine global route planning with local perception to generate the vehicle's trajectory.
